1) With custo holter software standard and professional all types of custo med holter recorders can be used, except for custo flash 501 and custo flash 501/L
2) Software functions "combination evaluation", "multiday evaluation" and "pacemaker" are only possible with the recorder types mentioned in the table.
3) custo screen 300 is an ABPM recorder. If it is attached to the patient simultaneously with a holter recorder the two evaluations will be displayed as Holter-ABPM evaluation based on their time-shared recording.
